Chemical Geology 145 (1998) 491–492

CHEMICAL GEOLOGY
INCLUDING
ISOTOPE GEOSCIENCE

# Contents Volume 145, 1998

**Vol. 145, Nos. 1–2**

*Resesarch Papers*

Metamorphic overprinting of Sm–Nd isotopic systems in volcanic rocks: the Telemark Supergroup, southern Norway
T.S. Brewer and J.F. Menuge . . . . . 1

Geochemical and isotopic characteristics of different types of anorthosite in the Namaqua mobile belt, South Africa
G.J. Geringer, A.E. Schoch, M. Sukhanov and D. Zhuravlev . . . . . 17

Spatial and temporal variations in early diagenetic organic matter oxidation pathways in Lower Jurassic mudstones of eastern England
K.G. Taylor . . . . . 47

Tracing the source of gypsum in New Caledonian soils by REE contents and S–Sr isotopic compositions
T. Toulkeridis, P. Podwojewski and N. Clauer . . . . . 61

Temperature–carbon dioxide partial pressure trends in confined aquifers
A. Coudrain-Ribstein, P. Gouze and G. de Marsily . . . . . 73

High-yield lithium separation and the precise isotopic analysis for natural rock and aqueous samples
T. Moriguti and E. Nakamura . . . . . 91

Contrasting origin of palaeofluids in a strike-slip fault system
P. Muchez and M. Sintubin . . . . . 105

*Isotope Geoscience Section*

Intercalibration of standards, absolute ages and uncertainties in $^{40}Ar/^{39}Ar$ dating
P.R. Renne, C.C. Swisher, A.L. Deino, D.B. Karner, T.L. Owens and D.J. DePaolo . . . . . 117

**Vol. 145, Nos. 3–4**

## Special Issue: Geochemical Earth Reference Model (GERM) by F. Albarède, J. Blichert-Toft, H. Staudigel and W.M. White (Guest-Editors)

*Contents Special Issue* . . . . . iii

Geochemical Earth Reference Model (GERM): description of the initiative
H. Staudigel, F. Albarède, J. Blichert-Toft, J. Edmond, B. McDonough, S.B. Jacobsen, R. Keeling, C.H. Langmuir, R.L. Nielsen, T. Plank, R. Rudnick, H.F. Shaw, S. Shirey, J. Veizer and W. White . . . . . 153

Fundamental aspects of quantitative models for geochemical cycles
A.C. Lasaga and R.A. Berner . . . . . 161

Isotopic constraints on the Cenozoic evolution of the carbon cycle
L.M. François and Y. Goddéris . . . . . 177

Metamorphic $CO_2$ degassing from orogenic belts
D.M. Kerrick and K. Caldeira . . . . . 213

$CO_2$ fluxes from mid-ocean ridges, arcs and plumes
B. Marty and I.N. Tolstikhin . . . . . 233

The hydrogen isotope composition of seawater and the global water cycle
C. Lécuyer, P. Gillet and F. Robert . . . . . 249

The oxygen isotopic composition of the oceans, sediments and the seafloor
K. Muehlenbachs . . . . . 263
Oxygen isotopic fluxes associated with high-temperature processes in the rift zones of Iceland
B. Gautason and K. Muehlenbachs . . . . . 275
Detrital sediment fluxes from continents to oceans
W.W. Hay . . . . . 287
The chemical composition of subducting sediment and its consequences for the crust and mantle
T. Plank and C.H. Langmuir . . . . . 325
Thermal structure, thickness and composition of continental lithosphere
R.L. Rudnick, W.F. McDonough and R.J. O'Connell . . . . . 395
Time-dependent models of U–Th–He and K–Ar evolution and the layering of mantle convection
F. Albarède . . . . . 413
Thermal and rare gas evolution of the mantle
J. Phipps Morgan . . . . . 431
Hf isotope constraints on mantle evolution
V.J.M. Salters and W.M. White . . . . . 447
Reconciling siderophile element data in the Earth and Moon, W isotopes and the upper lunar age limit in a simple model of homogeneous accretion
J.D. Kramers . . . . . 461
Topography: a robust constraint on mantle fluxes
G.F. Davies . . . . . 479
